Flow Trigger Explorer   New Flow

Try the Automation Lightning App!

These new features are available only in the Automation Lightning app:

- Search for automations
- Sort your list views with more options
- Organize your automations with categories and subcategories

If you don't see the app in the App Launcher, check that Enable the Automation Lightning App is selected in Process Automation Settings.

Help for this Page ?

Custom Object Definition Edit   [Save] [Save & New] [Cancel]

Custom Object Information   ▮ = Required Information

The singular and plural labels are used in tabs, page layouts, and reports.
Be careful when changing the name or label as it may affect existing integrations and merge templates.

Label   [Hotel]   Example: Account
Plural Label [Hotels]   Example: Accounts
Starts with vowel sound ☐

The Object Name is used when referencing the object via the API.

Object Name [Hotel]   Example: Account

Description [   ]

Context-Sensitive Help Setting   ◉ Open the standard Salesforce.com Help & Training window
                                 ○ Open a window using a Visualforce page
Context Name [--None-- ∨]

Enter Record Name Label and Format

The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Record Name [Hotel Name]   Example: Account Name

Data Type [Text ∨]   Warning: If you plan to insert a high volume of records in this object, via the API for example, use the Text data type.

Optional Features

☑ Allow Reports
☐ Allow Activities
☐ Track Field History
☐ Allow in Chatter Groups
☐ Enable Licensing ⓘ

Object Classification

When these settings are enabled, this object is classified as an Enterprise Application object. When these settings are disabled, this object is classified as a Light Application object. Learn more.
